

TRADING · AGENTS · AUTOMATION

THE AI LAYER FOR MODERN FOREX

Trading intelligence. Controlled AI execution. Operational automation.

TAP TO EXPLORE →

EXPLORE

WHERE SHOULD WE START?

Tap any tile. Every page has a menu button to come back here.

01

THE IDEA

One AI layer across trading, clients and operations.

02

TRADING INTELLIGENCE

Market map, event engine, prediction and Copilot.

03

AI YOU CONTROL

Approval modes, permissions, risk guard and a stop button.

04

AI AGENTS

Sales, support, KYC, compliance, finance and more.

05

YOUR INDUSTRY

Brokers · Fintech · Liquidity · PayTech · Prop firms

06

LET'S TALK

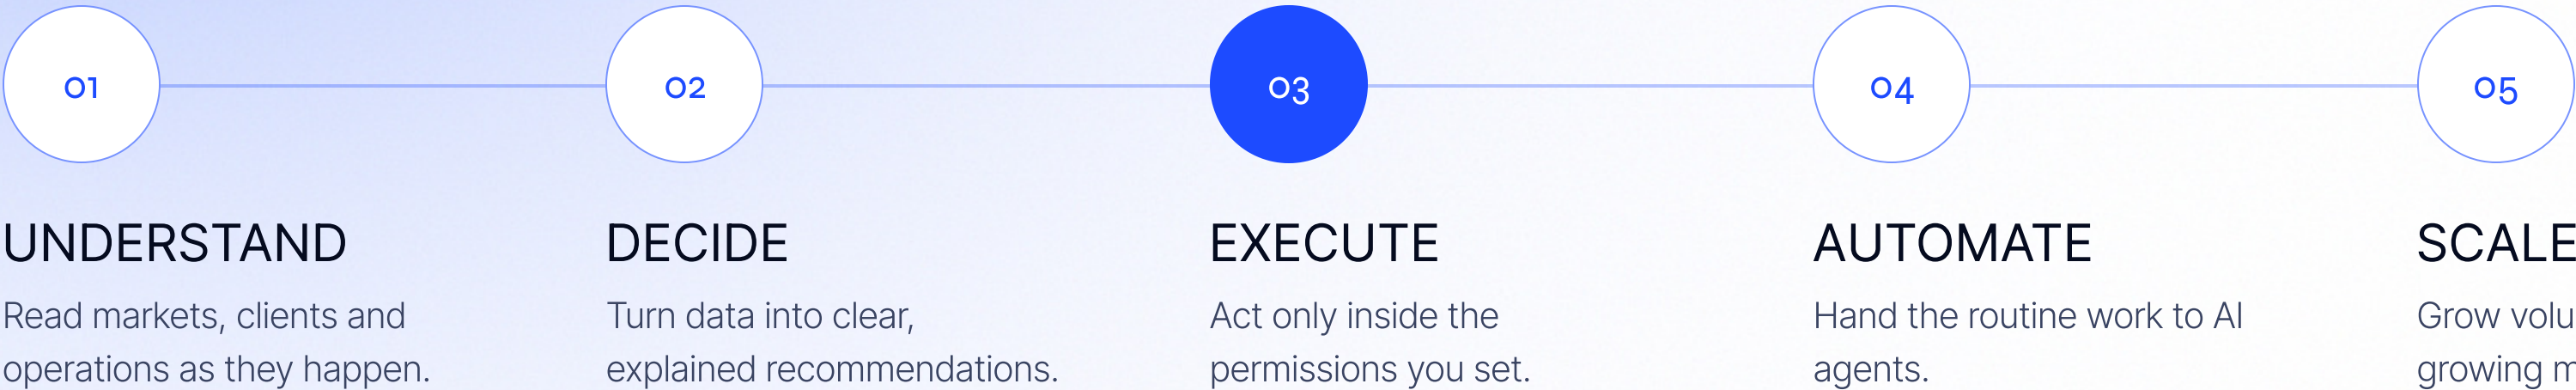

Bring us one manual workflow. Scan to book a call.

WHAT IF AI HANDLED
THE ROUTINE, AND YOUR
TEAM HANDLED THE
DECISIONS?

NOT A CHATBOT. NOT A TRADING BOT. AN AI LAYER.

Oglas AI sits on top of the systems you already run and moves your business through five steps — with people in control at every one.

ALWAYS WITH

- HUMAN CONTROL
- PERMISSIONS
- RISK LIMITS
- OVERSIGHT

ONE ECOSYSTEM. THREE LAYERS.

Start with one module. Connect them into one AI layer when you're ready.

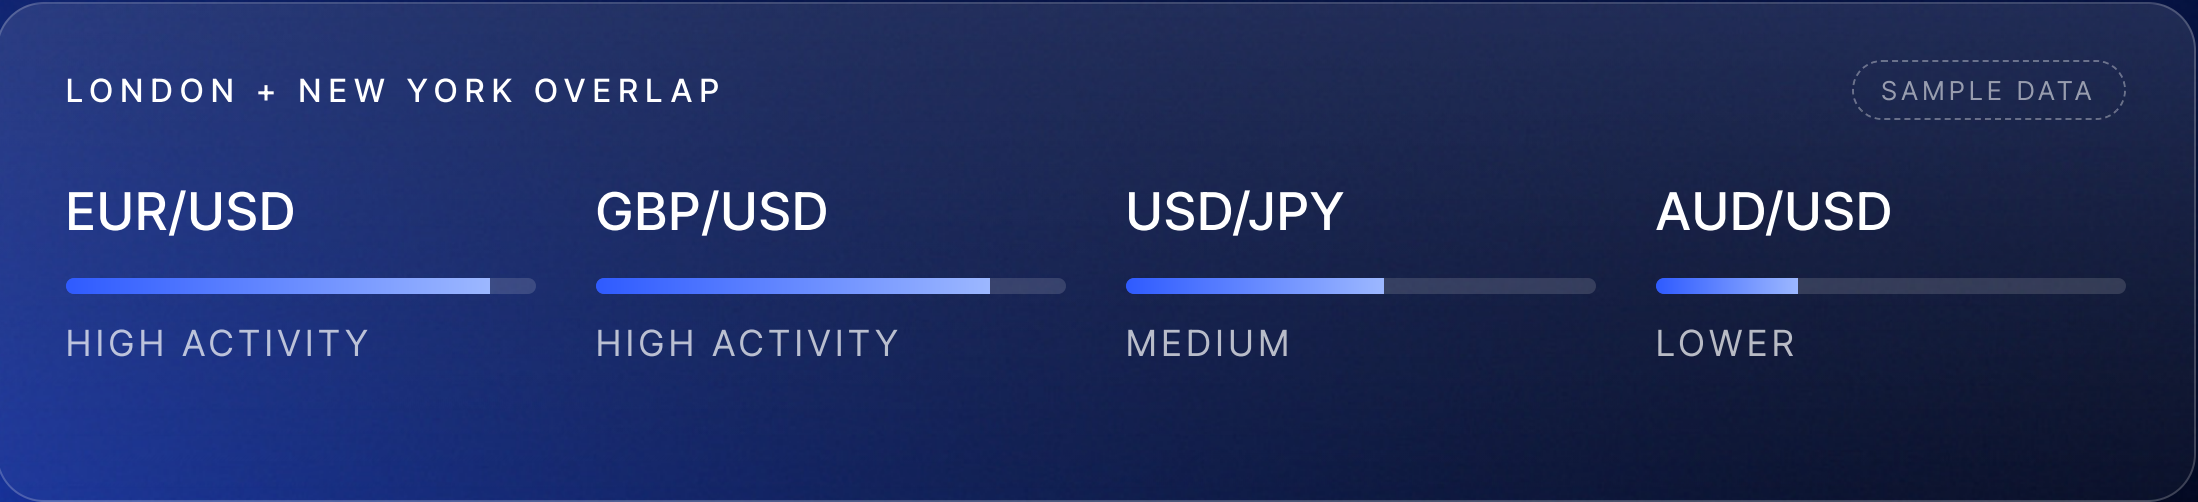

TRADING INTELLIGENCE

See the market. Understand the move. Act with control.

GLOBAL MARKET INTELLIGENCE

Sessions, events, volatility and market hubs on one screen — then ask the AI what changed.

NEW YORK	● Active
LONDON	● Active
TOKYO	● Upcoming
SYDNEY	● Closed

EVENT IMPACT ENGINE

Five live inputs become one plain-English market briefing.

Market context — not buy or sell calls.

● EVENT DETECTED

Elevated volatility observed

AI status

CAUTION / WATCH

AI BRIEFING

USD pairs and Gold are moving faster than usual. Similar events in the past brought short bursts of volatility. Review open exposure before adding risk.

SHORT-TERM AI PREDICTION

A short time horizon. A clear probability. Human judgement stays in the loop.

HONEST BY DESIGN

A probabilistic short-term forecast — not a guaranteed prediction. Live models are measured on real, out-of-sample results.

AI TRADING COPILOT

Ask the chart a question in plain English. The Copilot explains, then prepares a setup for review.

TRY ASKING

- What changed in the last 15 minutes?
- Why is volatility high?
- Compare this with yesterday.
- What are the key risks right now?

COPILOT · EUR/USD

DEMO

Why is EUR/USD moving?

Momentum turned positive after the London open.

Volatility is above its recent average, and US data is due in 40 minutes — so event risk is **medium**.

Bias: bullish, 63% up over the next 5–15 min.

Prepare a setup within my rules.

Ask about this chart...

TRADE PROPOSAL

FOR REVIEW

Instrument	EUR/USD
AI analysis	Bullish
Probability	63%
Volatility	High
Event risk	Medium
Potential setup	BUY
Risk (from your rules)	0.50%

REVIEW ORDER

The Copilot prepares.
You decide.

AI CAN ACT. WITHIN RULES YOU DEFINE.

MODE 1

MANUAL

AI analyses.
You decide and execute.

MODE 2

APPROVAL

AI prepares the trade.
You approve it.

MODE 3

CONTROLLED AUTO

AI executes only inside your
rules and permissions.

PERMISSIONS, LIMITS AND A STOP BUTTON.

AI acts within your rules.
You stay in control.

STOP AI TRADING

AI AGENTS

Routine work runs automatically.
People handle the exceptions.

SIXTEEN AGENTS. THREE TEAMS.

TRADING AGENTS

Market Analyst

Monitors markets and writes briefings

Prediction

Runs short-term forecasting models

Execution

Prepares or places trades within permissions

Risk Guardian

Checks every order against your rules

Backtesting

Tests and summarises strategies

CLIENT AGENTS

Sales

Qualifies leads, follows up, books calls

Support

Answers routine questions, creates tickets

KYC

Guides onboarding, reads documents, flags gaps

Retention

Spots inactivity, triggers approved outreach

Multilingual Voice

Handles and summarises calls, updates CRM

BUSINESS AGENTS

Compliance Copilot

Reviews messages, flags issues, searches policy

Finance

Reconciles payments, reports exceptions

Reporting

Turns raw data into management reports

Call QA

Transcribes, summarises and checks calls

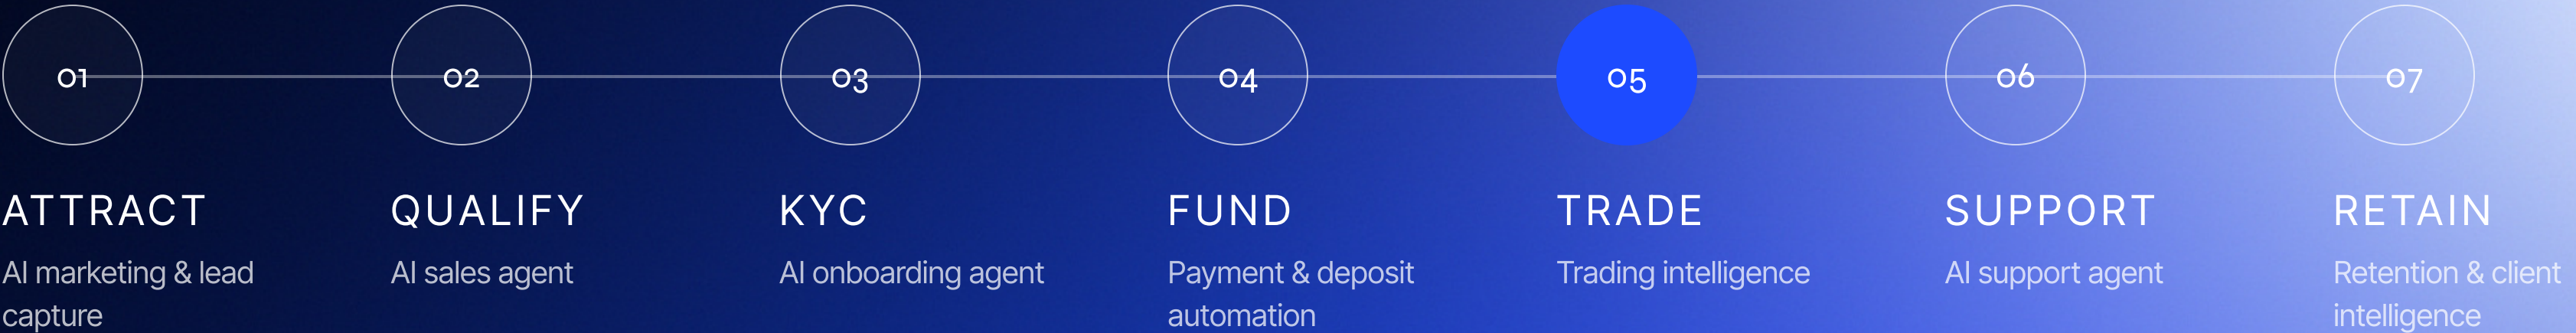

Fraud Detection

Finds unusual behaviour, ranks investigations

Management AI

Answers leadership questions in plain English

ONE CLIENT. ONE CONNECTED JOURNEY.

 One connected AI layer — instead of disconnected automation.

AI HANDLES THE ROUTINE. PEOPLE HANDLE THE DECISIONS.

TODAY

Manual lead follow-up

Manual KYC checking

Repeated support questions

Manual reporting

Manual reconciliation

Manual call reviews

Manual monitoring

WITH OGLAS AI

→ ✓ AI qualifies and follows up leads

→ ✓ AI flags missing KYC information

→ ✓ AI resolves routine support

→ ✓ AI prepares the reports

→ ✓ AI reconciles transactions

→ ✓ AI reviews every call

→ ✓ AI detects anomalies

YOUR TEAM FOCUSES ON

WHAT WE BUILD FOR YOU

- ✓ AI Trading Copilot & short-term prediction
- ✓ Controlled AI execution with risk guard
- ✓ Market intelligence & event engine
- ✓ AI Sales, Support & KYC agents
- ✓ AI Retention agent
- ✓ Compliance Copilot
- ✓ Finance & reconciliation agent
- ✓ Risk intelligence & Management AI

START THE CONVERSATION

“How are you currently handling lead follow-up, KYC and customer support?”

 Then we map one workflow together.

FINTECH & SOFTWARE SOLUTIONS

YOUR PLATFORM + OGLAS AI

WHAT YOU DEAL WITH EVERY DAY

- Turnkey broker systems
- White-label trading tech
- CRM platforms
- Financial software
- Broker infrastructure

WHAT WE BUILD FOR YOU

- ✓ Embedded AI assistant
- ✓ AI sales module
- ✓ AI support
- ✓ AI analytics & predictive insights
- ✓ AI KYC workflows
- ✓ AI agent orchestration
- ✓ Intelligent reporting
- ✓ Offered as a white-label AI capability

START THE CONVERSATION

“Does your platform already have an AI layer for your clients?”

 Then we map one workflow together.

LIQUIDITY PROVIDERS

WHAT YOU DEAL WITH EVERY DAY

- Market connectivity
- Liquidity
- Institutional infrastructure
- Multi-asset trading
- Monitoring
- Risk
- Operational reliability

WHAT WE BUILD FOR YOU

- ✓ Market intelligence
- ✓ Exposure monitoring
- ✓ Anomaly detection
- ✓ Risk Copilot
- ✓ Trade surveillance
- ✓ Operational monitoring
- ✓ Intelligent reporting
- ✓ AI support for institutional teams

START THE CONVERSATION

“How are you monitoring exposure, anomalies and operational data?”

 Then we map one workflow together.

PAYMENT & PAYTECH

WHAT YOU DEAL WITH EVERY DAY

- Deposits
- Withdrawals
- Payment processing
- Cross-border transactions
- Reconciliation
- Failed transactions
- Customer support
- Fraud

WHAT WE BUILD FOR YOU

- ✓ Payment operations agent
- ✓ AI reconciliation
- ✓ Exception detection
- ✓ Fraud & anomaly detection
- ✓ Customer support automation
- ✓ Payment status agent
- ✓ Automated reporting

START THE CONVERSATION

“How much of your reconciliation and exception handling is still manual?”

 Then we map one workflow together.

PROP TRADING & DIGITAL ASSETS

WHAT YOU DEAL WITH EVERY DAY

- Trader onboarding
- Account management
- Risk
- Trader monitoring
- Support
- Payments
- Analytics
- Automation

WHAT WE BUILD FOR YOU

- ✓ Trader intelligence & analytics
- ✓ Risk Copilot
- ✓ AI support agent
- ✓ Onboarding automation
- ✓ Fraud & anomaly detection
- ✓ AI reporting
- ✓ Controlled AI execution workflows

START THE CONVERSATION

“How much of your trader onboarding, support and risk monitoring is automated?”

 Then we map one workflow together.

AI SHOULD OPERATE INSIDE EXPLICIT CONTROLS.

01

User consent

Nothing runs without explicit opt-in.

02

Role permissions

Each role sees and does only what it should.

03

Risk limits

Hard limits the AI cannot cross.

04

Approval modes

Manual, approval or controlled auto.

05

Audit logs

Every action recorded and traceable.

06

Explainable outputs

Every result comes with its reasons.

07

Human escalation

Exceptions go to the right person.

08

Emergency stop

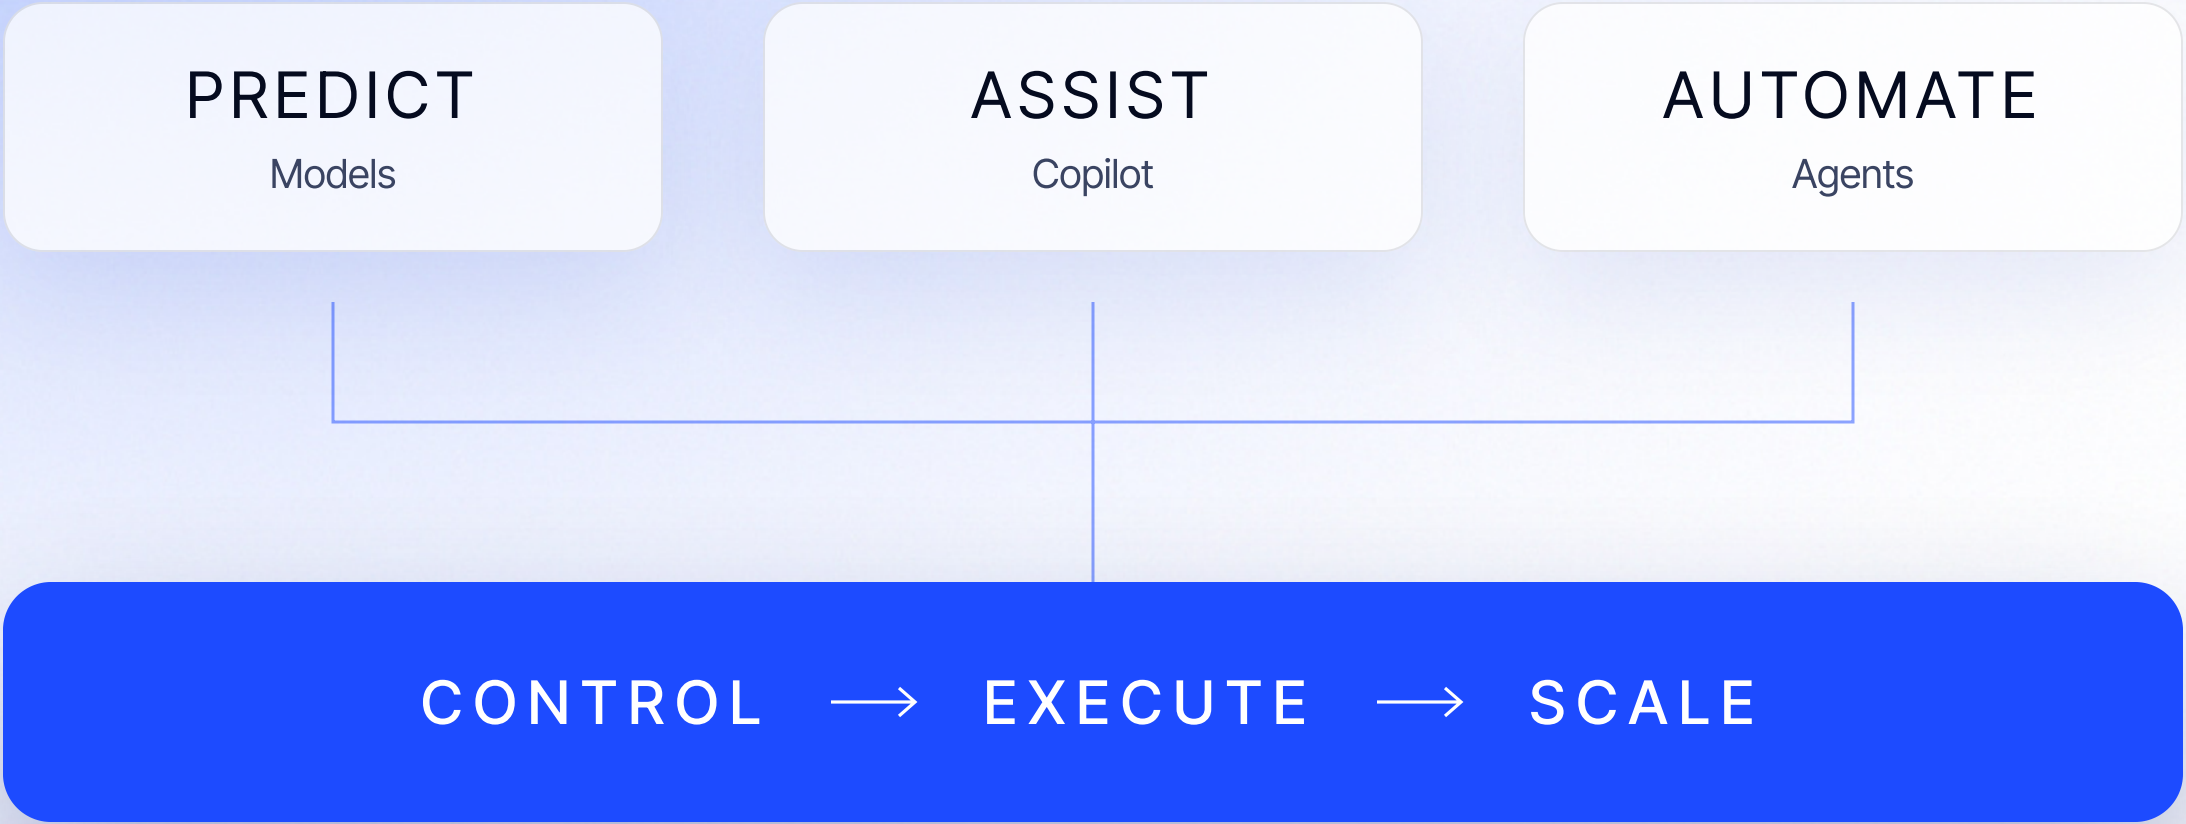

One switch pauses the AI instantly.

"AI can act, but it acts within rules you define."

WHAT WE ACTUALLY BUILD

CUSTOM AI INFRASTRUCTURE FOR THE TRADING INDUSTRY.

NOT JUST ~~Chatbots~~ ~~Trading bots~~ ~~Dashboards~~ ~~AI models~~

BUILT FROM

- AI agents
- Automation
- ML models
- Data
- Integrations
- Workflows
- Dashboards
- Voice AI
- Intelligence

Delivered as one system, built around your business rules.

LET'S TALK

GIVE US ONE WORKFLOW YOUR TEAM STILL DOES MANUALLY.

We'll map it, connect your tools and show you how AI can run it.

INTELLIGENCE FOR MARKETS. AUTOMATION FOR BUSINESS.
